Intra
Design: Phoenix Design

Model 295/7

Lots of people are fed up with the archetypal symbols of good taste that make so many boardrooms and conference spaces look identical.

New functional features are also required for those higher up in hierarchies to keep body and mind on the ball in agile working environments and meetings. Which is why the new Intra conference chair comes with a precision-adjustable height and a motion-stimulating synchronous adjustment mechanism with automatic weight adjustment.

The synchro-adjustment mechanism and controls fuse almost invisibly with the similar form of the seat shell and the elegantly integrated armrests. Intra's fluid lines, the precise way the high-quality materials are combined and its dynamic comfort make it the new frontrunner for today's executives – whether it's in a conference room or an office.

Model 295/6

Standard height backrest
295/6

Medium-height backrest
